

City of Creola Announces Major Funding Awards for Public Safety Building and Wetlands Acquisition

Creola, AL – The City of Creola is proud to announce the award of two significant funding allocations that will directly benefit the safety, growth, and environmental preservation of our community.

The city has secured \$2 million in funding for the construction of a new Public Safety Building. The project underscores Creola's commitment to ensuring the safety and well-being of its citizens while planning for future growth.

In addition, Creola has been awarded \$350,000 for the acquisition of wetlands property within city limits. This investment will help preserve sensitive ecological areas, maintain natural flood protection, and provide environmental stewardship for future generations. Protecting Creola's wetlands ensures long-term community resilience while safeguarding valuable natural resources and wildlife habitats.

Mayor Don Nelson expressed gratitude for the funding awards, noting their importance for both public safety and environmental preservation:

"This is a historic moment for Creola. The new Public Safety Building will strengthen our emergency services, while the wetlands acquisition reflects our shared responsibility to protect the land and natural resources entrusted to us. Together, these projects show the balance of preparing for growth while caring for our environment."

City officials will release additional details regarding project timelines and community engagement opportunities in the coming months.
